Harvest: After picking, the separated berries are sorted twice at the cellar, first mechanically and then by hand. The grapes are vatted with **no addition of sulphur** and yeast inoculation is carried out when the vats are first filled, based on the principle of the bioprotection

Winemaking: Cold pre-fermentation maceration at 4°C for 6 to 10 days under blanket gas. Slow fermentation at temperatures below 26°C with 2 to 3 rack and return operations by gravity per day. Maceration under skins for 10 to 21 days at 28°C. The average period in vats is 21 to 32 days.

Maturing: Final blending takes place early, at the end of November, then the wine is put in barrels (25% new) in mid-December to age for a further 12 months.
