

PICHON COMTESSE RÉSERVE

2023

BACK TO THE FUTURE

our many efforts and our determination to pursue organic and biodynamic viticulture with ever-greater precision and relevance, while also showcasing the development of our winemaking principles towards gentler and subtler techniques. It boasts a noble, racy power, tinged with the energy and liveliness of certain great vintages of yesteryear. Taut, imperturbable Cabernet Sauvignon is softened by the unctuous fleshiness of Merlot, in a blend that includes a few drops of Cabernet Franc. It is a blend we can be proud of for its balance of power, aromatic complexity and freshness. And what if the best was yet to come?

— NICOLAS GLUMINEAU

WITH THERMOREGULATION

AGEING

OAK BARREL: **12 MONTHS**
50% NEW OAK
LONG MEDIUM HEAT
TRADITIONAL RACKING "À L'ESQUIVE"
EGG WHITE FINING

BLEND

TASTING NOTES

The nose reveals a basket of red fruit aromas (redcurrant and wild strawberries) underpinned by sweet overtones of vanilla and accompanied by floral notes of iris. The palate is ethereal and powdery, revealing a floral and spicy elegance with hints of pepper. All in all, an incredibly lively, long-lasting and delicious wine with notes of cinnamon on the finish.

THE VINTAGE

The winter was relatively mild, favouring rather early **BUD BREAK** in the first half of April. This period saw some very cold nights, particularly on 5 April, requiring us to take all the necessary steps to protect the vines from frost. The growing season was marked by regular rainy spells and a high threat of mildew. Thanks to a great deal of effort and the fact that rainfall was scattered a few days apart, the threat of vine diseases remained under control, allowing **FLOWERING** to unfold in late May and **VERAISON** (colour change) in early August. Despite the impression of a gloomy spring and summer, with several cold and rainy spells, particularly between June and August, the growing season was one of the driest years in modern history. The **HARVEST** took place from 6 to 30 September 2023 – virtually the same dates as the previous vintage. Excellent weather conditions during the harvest meant pickers could wait until the ideal time to harvest the grapes, according to the technological and phenolic ripeness achieved in each plot.
